**FUNCTIONAL SCULPTURE IN SERVICE OF CUISINE**

“Sometimes magic is just someone spending more time on something than anyone else might reasonably expect.”

***Will Guidara, Unreasonable Hospitality***

# YOUR GUESTS EXTRAORDINARY EXPERIENCE IS OUR GOAL TOO

Let's make it happen with:

**Tailored collections** created to reflect your culinary vision.

**A collaborative approach** where we design together, piece by piece.

**Durable craftsmanship** built for the rhythm of a professional kitchen.

# FORM WITH PURPOSE

**Because every dish tells its own story  
and every story deserves its own design.**  
We shape ceramics that serve one intention:  
to elevate your cuisine  
and enrich the guest's experience.

# FUNCTIONAL VERSATILITY

Textured vessels for caviar and amuse-bouche;  
Broad plates for signature presentations;  
Organic bowls for broths and consommés;  
Each designed for your specific culinary applications.

# DESIGN WITHOUT BOUNDARIES

Design has no borders and no fixed aesthetic when it answers a need.  
Each piece becomes exactly what the dish requires.

# ART IS DIFFICULT TO PLACE IN A CATALOGUE

Yet we've shaped our diverse directions into distinct collections, each defined by its technique, form, and creative language.

These lines reflect the breadth of our work, but our true superpower remains collaboration: listening, adapting, and creating pieces that respond to the chef, the space, and the context.

**Color Stories** is our modern response to the power of color on the table — a trio of porcelain collections that let you mix, build, and express your style.

Whether you choose soft neutrals or bold hues, clean finishes or artistic textures, each piece is handcrafted and designed to work in harmony or contrast. We can also develop custom colors tailored to your vision.

This is our bestselling collection — organic forms that never tire, with colors that adapt to any project.

These variations create a rich diversity within the collection, complementing the play of colors, adding emphasis where needed, and introducing depth and contrast.

The result is tableware that not only serves its function but also surprises and delights with every new presentation. [Learn more](#)
